

Bumblebee Flyer

1. Print this template on regular paper. Colour the pieces.
2. Cut out the body and wings along the dashed lines. Place the wings to the side.
3. Fold along the dotted lines on the body starting with the very tip. Continue folding on the dotted lines using a rolling fold (**not** an accordion fold).
4. Use your fingers to gently curve the folded portion of the wings into a circle.
5. Put a small amount of glue on the area that says "GLUE HERE" on the wings. Insert the glued section into the opposite side of the fold until the grey portion is no longer visible to create a cylinder.
6. Place a small amount of glue onto the middle of the wings. Stick the wings on top of the body above where you glued the two tabs together.
7. Take a paperclip and attach it to the bottom of the bee underneath the wings. You can adjust the position of your paperclip to make your bee glide in different directions.
8. Drop your bumblebee and watch it glide!
